MODERN . COMPLIANT . COST EFFECTIVE

Our Solutions

Receiving

Increase receiving process performance and accuracy. Error free receiving against the purchase order or shipment document.

Inspection and Quality Control

Record QC detail and manage their storage and returns. Implement QC as an optional or mandatory step in your receiving and/or dispatch workflows.

Sales Order Processing

Optional solution to manage your sales order process - Quote-to-Invoice.

Packaging and Labelling

Package items and label them with our GS1 compliant solution.

Returns and Expiry Management

Control cost and prevent losses. Manage all your customer and vendor/supplier returns and the related lifecycle or the damaged or expired products.

Customer Experience

Provide accurate and real-time information to your customers with a beautiful intuitive application.

Environment Monitoring

Monitor warehouse environment parameters using IoT Sensors.

Storage

Single-view of your warehouses and their storage statuses to maximize your capacity utilization. Manage all your warehouses and their storages from a single view.

Inventory Management

Monitor, track, and control stock levels to optimize storage, reduce wastage, save labor and speed up dispatch.

Purchase Order Processing

Optional solution to manage your purchase order process - Requisition-to-Invoice.

Shipping and Distribution

Self-owned or 3PL, one solution to manage all your shipment needs.

Reports

Be agile with real-time reports.

AIDC

Automatic Identification and Data Capture (AIDC) based fast and error-free data capturing to increase operational efficiency.

End-to-end Visibility

Monitor item movement from receiving to distribution to have complete visibility of the stocks.

Hardware Offerings

Label Printers

Wireless Scanner

Industry Grade Rugged Mobile Terminal

Sensors & Data Loggers
